PROJECTS

Intelligent Car Rental System with Dynamic Vehicle Availability

01/2025 – present

Car Rental System is a digital platform that enables individuals and businesses to rent vehicles for a specified period, catering to travelers, commuters, and temporary transportation needs. It offers various vehicle options, including economy, luxury, SUVs, and vans, with essential features such as online booking, real-time availability, pricing comparison, GPS tracking, and secure payments, ensuring a seamless user experience.

Bike Rental System Web Application

10/2024 – 12/2024

Peoples travelling in motor bikes have increased in recent years. Many high model motor bikes are introduced and many people travels hundreds of kilometers in these bikes. But such bikes are so much of cost so that many people cannot buy those bikes. So bike hiring is getting popular now a days and many peoples are willing to hire the motor bikes for the travelling. But there is no complete web application that contains the process of hiring the motor bikes. So we develop a web site that allows the user to hire the motor bike they chooses.

Digital Certificate Generation for Bonafide.

03/2023 – 05/2023

The bonafide certificate generation system is a system which allows the digital automation of the bonafide of the students. The system will generate the bonafide in Portable Document Format which is globally accepted format for files.
